
Outside practical class at the preschool educational institution

On October 31st, 2018, at a Kyiv preschool educational institution № 590 a practical class on "Technologies of socio-cultural partnership in education" in "Methodology of educational partnership" was held for the second year students of the specialty "Preschool education" (A. Karnaukhova, Ph.D., senior lecturer of the Department of Pedagogy and Psychology).

Students got acquainted with the technologies of socio-cultural partnership. For example, the teaching staff of a preschool educational institution cooperates with the teaching staff and student groups of Kyiv Institute of Music named after R. M. Hlier. Within the framework of this social and cultural partnership, thematic musical evenings, concerts and presentations are held, and music clubs for preschool children are functioning. This is one of many components of the educational partnership of the Department of Preschool Education.
